

Estimation!

Estimate the product by rounding the number to the nearest ten, and then multiply.

Example: 48×9

1. Round 48 to the nearest ten $\rightarrow 50$
2. Multiply 50 by 9 $\rightarrow 50 \times 9 = 450$
3. The final product is around 450

Find the products of the multiplication sentences below using estimation. See the example.
