Grandma's Quilt

Practice Finding Area

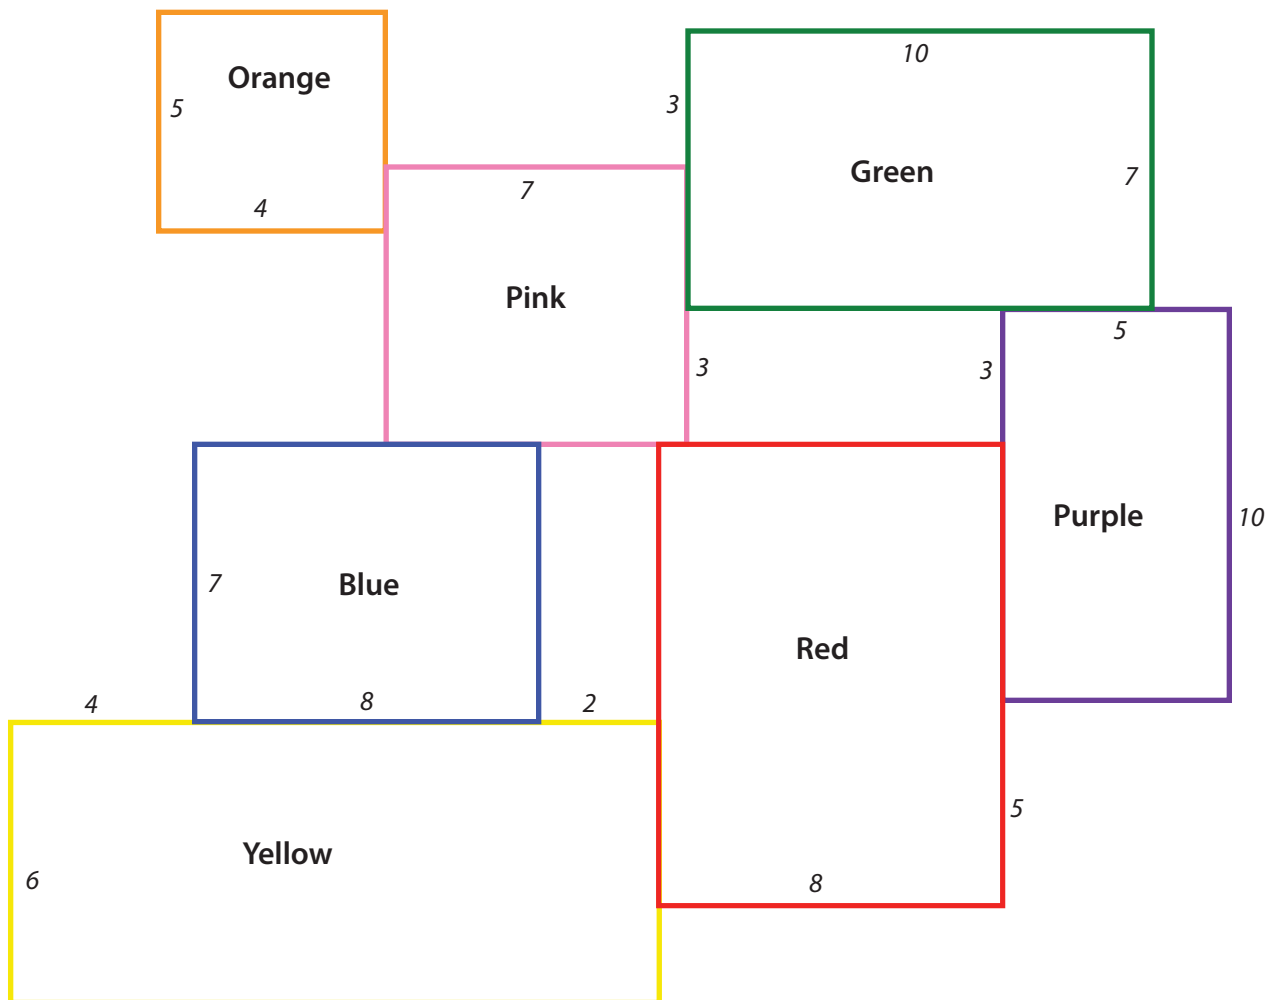

Help Grandma make a quilt by finding the area of each piece of cloth she needs to cut. Then find the total of all the pieces. Don't forget to answer the question below. **Remember:** Area = length x width.

Example:

Area of orange cloth

$$= 4 \times 5$$

$$= 20 \text{ square inch}$$

Total = _____

?

The red, pink, orange, and yellow cloth cost \$3 per square inch.
The blue, green, and purple cloth cost \$4 per square inch.
How much in total does Grandma need to spend?
