

# Flower Probability

A bee is gathering pollen for his hive. Answer the probability questions below to see which flower the bee will probably choose.

1. What is the probability the bee chooses a yellow flower?

---

2. What is the probability the bee chooses a blue flower?

---

3. What is the probability the bee chooses a white flower?

---

4. What would the probability of the bee choosing a white flower be, if we added 2 more?

---

5. What would the probability of the bee choosing a yellow flower be, if we removed one?

---
