

Say It With Emoji

Did you know that if emoji were a language, it would be the fastest-growing language in the world?

In this activity, put your visual communication skills to the test — by using them to correctly (and creatively) share and identify information written in emoji.

- For each of the categories below, write out your answer in the first column.
- In the second column, use emojis to write the same response. Get creative! Can you use emojis in unexpected ways?
- Fold the paper in half. Can a partner correctly identify your meaning based on emojis alone?

Tip: For a complete directory of emojis, visit unicode.org/emoji/charts/emoji-list.html

(fold here)
