

Shapes with Symmetry

A shape has **symmetry** when two sides look the same. A shape is symmetrical if it can be folded in half and the two sides are mirror images of each other.

A line of **symmetry** is a line that separates the shape into two parts that are the same shape and size.

Part 1 - Is it a symmetrical shape?

Directions: Determine if each shape has a line of symmetry. Write yes or no on the line.

Symmetry? _____

Symmetry? _____

Symmetry? _____

Symmetry? _____

Symmetry? _____

Symmetry? _____

Symmetry? _____

Symmetry? _____

Part 2 - Lines of symmetry

Directions: Draw one line of symmetry in each shape below.

<p>9. </p>	<p>10. </p>
<p>11. </p>	<p>12. </p>

Part 3 - Draw a symmetrical shape

Directions: Draw a symmetrical shape that is not seen above. Then draw its line of symmetry.
