w h eel

— — ark

ben — —

too — —

— — istle

fi — —

— — eese

Brain Box

Digraphs are two consonants that are next to each other. Together, they make a new sound.

Example: **thirty**

The **digraph** in this word is **t-h**. When you say **thirty** you don't hear the **t** and **h** sounds separately. You hear the new **th** sound.
