# Easy Math Word Problems #3

Fresh fruit salad anyone?
Use addition or subtraction to solve the word problems.

Fruit Salad #1
Let's make a fruit salad! Put 5 grapes in a bowl. Add 6 pieces of watermelon. Put 3 cut-up strawberries in the bowl. Finally, add 4 slices of banana. How much fruit is in the bowl altogether?

Fruit Salad #2
How about a different version? Put 12 melon balls in a bowl. Add 8 slices of orange and 14 blueberries. How much fruit is there altogether?

Fruit Salad #3
This fruit salad has already been put together but it has too many raspberries. There are 16 raspberries but you want only 9. How much less raspberries do you need?

Fruit Salad #4
This fruit salad is already made as well. It has lots of good fruit but not enough grapes. There are only 6 grapes and you would like 18. How many more grapes do you need?
