# SKIP YOUR WAY THROUGH MULTIPLICATION

Skip counting is a strategy for division problems.

**Example:**  $3 \times 4 = \underline{12}$   
4, 8, 12

I skip counted by 4. I did this 3 times. 12 is my answer.

**Directions:** Use skip counting as seen in the example above to solve the following multiplication problems.

1.  $3 \times 6 =$  \_\_\_\_\_

6.  $8 \times 3 =$  \_\_\_\_\_

2.  $2 \times 9 =$  \_\_\_\_\_

7.  $7 \times 4 =$  \_\_\_\_\_

3.  $5 \times 5 =$  \_\_\_\_\_

8.  $4 \times 10 =$  \_\_\_\_\_

4.  $9 \times 8 =$  \_\_\_\_\_

9.  $7 \times 6 =$  \_\_\_\_\_

5.  $3 \times 5 =$  \_\_\_\_\_

10.  $4 \times 8 =$  \_\_\_\_\_
