

Make a Night Sky

What you will need:

- White construction paper
- Black and blue watercolor paint
- Paintbrushes
- Star stickers
- White crayons

How to make a night sky mural:

1. First, draw a night scene with your white crayon. Draw a moon and some stars.
2. Now paint the whole paper with black watercolor.
3. Can you see your white stars shining through? That is the wax in the crayons resisting the water paint!
4. When the paint is all dry add some shiny star stickers to give your picture some color.
