

Stewardship

Teacher directions: Glue or write the following questions on chart paper for each group.

1. Research and write down ways the earth is relying on us to make changes to better support the health and well-being of the environment.

2. Research one person in history who has served and cared for the earth. Write down your findings.

3. What are some problems in your local community connected to taking care of the environment and sustainability? What are some solutions to these problems?

4. Come up with a stewardship/service idea that you would like to participate in to bring these solutions to your community. Address each of the following questions:

- What would you like to do?
- When could you do this?
- What materials do you need?
- Where would this take place?
