

# Subtract and Compare

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Subtract to find the difference. Write your answer in the box.

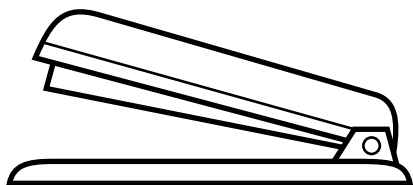

**Example:** This computer can be measured two ways:

Length: **17 inches** OR **14 paper clips**

How many more inches than paper clips are needed to measure it?

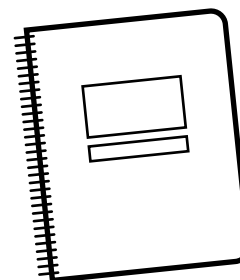

Think: **17 - 14 = 3**        3   inches

1. Length: **9 inches** OR **7 paper clips**.

How many more inches than paper clips are needed to measure it?

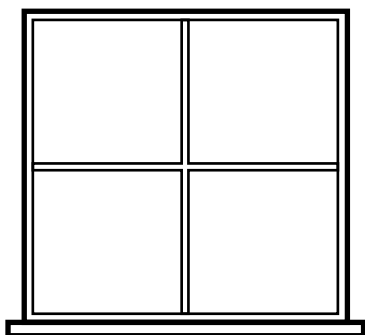

\_\_\_\_\_ inches

2. Length: **27 centimeters** OR **9 paper clips**.

How many more centimeters than paper clips are needed to measure it?

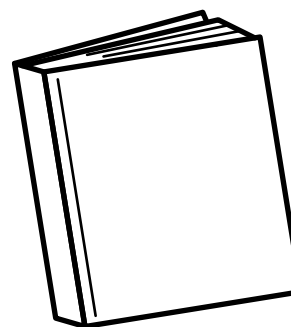

\_\_\_\_\_ centimeters

3. Length: **38 inches** OR **31 paper clips**.

How many more inches than paper clips are needed to measure it?

\_\_\_\_\_ inches

4. Length: **18 centimeters** OR **6 paper clips**.

How many more centimeters than paper clips are needed to measure it?

\_\_\_\_\_ centimeters

5. Are the paper clips in these problems smaller or larger than one inch? (circle one)

smaller

larger
