

Syllable Patterns: VCCV

Think of **VCCV words** as a peanut butter and jelly sandwich.

The peanut butter and jelly are the consonants, and bread are the vowels. So, when you split up the word into syllables, the consonants always stick to the vowels!

Example: rab/bit

Part 1. Read each word out loud, counting the syllables. Write down the number of syllables and draw a slash between the syllables.

Hint: Each syllable has one vowel sound. Divide the syllables between consonants.

 2 funny

_____ pillar

_____ flagpole

_____ magnet

_____ pretty

_____ rabbit

_____ parrot

_____ tennis

_____ mirror

_____ until

_____ winter

_____ kitten

_____ happen

_____ sister

_____ cupcake

_____ welcome

Syllable Patterns: VCCV

With VCCV words, each syllable has one vowel sound. Syllables are divided between consonants.

.....

Part 2. Cut out each word. Read each word out loud, counting the syllables.
Does it follow the VCCV rule? Paste each word in the correct column.
