USING A THERMOMETER TO SOLVE TEMPERATURE PROBLEMS

Directions: Use the thermometer to help solve the problems about temperature.

Example: The temperature on a fall afternoon is 64 degrees F. The morning temperature was 22 degrees cooler. What was the temperature in the morning?

To solve this problem start by drawing a line at the 64 degrees mark.

Then count down 22 spaces to get to the answer.

64 - 22 = 42 The temperature in the morning was 42 degrees Fahrenheit.

Now, you try. Read the problems and use the thermometers to help you solve them. Then, write a number sentence to go with each problem.

In September, the highest temperature was 68 degrees F and the lowest temperature was 29 degrees cooler. What was the lowest temperature in September?

Number sentence

The lowest temperature in September was

2	One summer day the high temperature was 92 degrees F. By the evening it had cooled down 15 degrees. What was the temperature in the evening?
