

TIMING IS EVERYTHING

Tim is very timely with his fashion statements.

- Each time Earth makes one entire trip around the Sun, he wears a plaid shirt.
- Each time the Moon makes one entire trip around Earth, he wears a red hat.
- Each time Earth rotates on its axis, he wears a new pair of blue underwear.

If he starts January 1 and ends on December 31, how many times a year does Tim wear each piece of clothing?
