Tracking Character Traits

Character traits are words that help us understand and describe a character's personality.

Usually, we can see a character's traits through their repeated actions. For example, if a character is careful when they use sharp scissors and they look both ways before crossing a street, we might describe them as cautious. Here are some other words that you could use to describe a character:

funny	smart	mischievous	shy	responsible
rude	honest	brave	generous	bossy	friendly

Directions: *Use the chart below to record a character's traits.*
Provide evidence from the text as an example of why you chose each trait.
