## EL SUPPORT LESSON PLAN: DECIMAL PLACEMENT WITH DIVISION

### dividend

$$\begin{array}{r} 4.3 \\ 2 \overline{) 8.6} \leftarrow \text{dividend} \\ \underline{-8} \downarrow \\ 06 \\ \underline{-6} \\ 0 \end{array}$$

the number in an expression being divided or separated

### divisor

$$\begin{array}{r} 4.3 \\ \text{divisor} \rightarrow 2 \overline{) 8.6} \\ \underline{-8} \downarrow \\ 06 \\ \underline{-6} \\ 0 \end{array}$$

the number in an expression that shows the number of groups to divide the dividend

### quotient

$$\begin{array}{r} 4.3 \leftarrow \text{quotient} \\ 2 \overline{) 8.6} \\ \underline{-8} \downarrow \\ 06 \\ \underline{-6} \\ 0 \end{array}$$

the result of a division problem

### value

how much a number is worth based on its placement in the place value chart

# VOCABULARY CARDS

## EL SUPPORT LESSON PLAN: DECIMAL PLACEMENT WITH DIVISION

place value chart

a chart used to list periods  
and values for numbers

---

---

---

digit

a whole number

---

---

---
