# VOCABULARY CARDS

## EL SUPPORT LESSON PLAN: DESCRIBING ANGLES

right angle

right angle, 90 degrees

the angle formed where two perpendicular lines meet; it measures 90 degrees
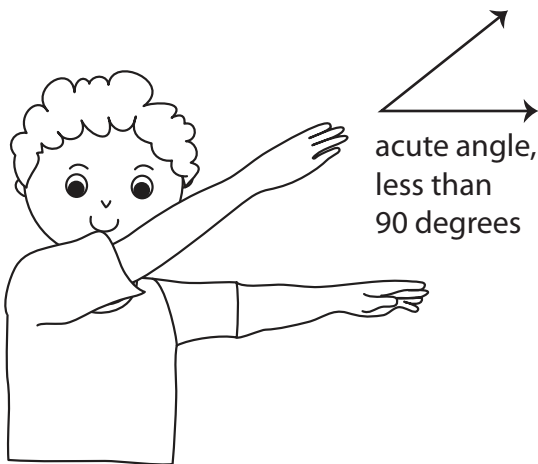

obtuse angle

obtuse angle, more than 90 degrees

an angle greater than 90 degrees and less than 180 degrees
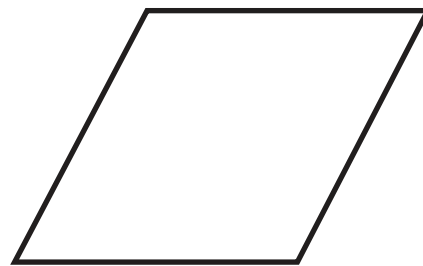

acute angle

acute angle, less than 90 degrees

an angle of less than 90 degrees

parallelogram

a flat, closed figure with four straight sides; the opposite sides are parallel and equal to each other

VOCABULARY CARDS

trapezoid

a flat, closed figure with four straight sides; of these sides, only two are parallel

degrees

a measure for angles
