

VOCABULARY CARDS

EL SUPPORT LESSON PLAN: WAYS TO REPRESENT SKIP COUNTING

factor

$$\begin{array}{c} \downarrow \\ 4 \end{array} \times \begin{array}{c} \downarrow \\ 5 \end{array} = 20$$

any one of two or more numbers that are multiplied together to give a product

multiply

a mathematical operation in which we add a number to itself a certain number of times

product

$$4 \times 5 = \begin{array}{c} \downarrow \\ 20 \end{array}$$

the answer to a multiplication problem

skip counting

a strategy in which we count forward or backward by a number other than one
