

Weightlifting - Add it up!

Figure out how much weight each set of partners lifted.

Examples:

$475 + 262 =$

400	200	➔	600
70	60	➔	130
5	2	➔	+ 7
			<hr/>
			737

$274 + 142 =$

carry the one! ➔

$$\begin{array}{r} 1 \\ 274 \\ + 142 \\ \hline 416 \end{array}$$

1. If Anthony benches 225 kilograms and Gus benches 220 kilograms, how many kilograms have they lifted altogether?
2. If Katie snatches 137 kilograms and Kim snatches 153 kilograms, how many kilograms have they snatched altogether?
3. If Om clean & jerks 168 kilograms and Oscar clean & jerks 177 kilograms, how many kilograms have they clean & jerked altogether?
4. If Halil benches 265 kilograms and Zhan benches 255 kilograms, how many kilograms have they lifted altogether?
5. If Nurcan snatches 97 kilograms and Yang snatches 100 kilograms, how many kilograms have they snatched altogether?
6. If Liu clean & jerks 158 kilograms and Nataliya clean & jerks 135 kilograms, how many kilograms have they clean & jerked altogether?
