# What Type of Polygon?

A polygon is considered regular when the sides and angles are equal.
An irregular polygon contains sides or angles that are not equal.

**Fill in the chart to show different types of polygons.**

| Shape Name: | Regular | Irregular |
|---|---|---|
| **Hexagon** | | |
| **Pentagon** | | |
| **Octagon** | | |
| **Quadrilateral** | | |
| **Rectangle** | | |
| **Trapezoid** | | |
