What's Missing?
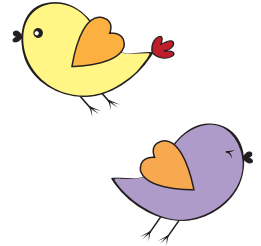

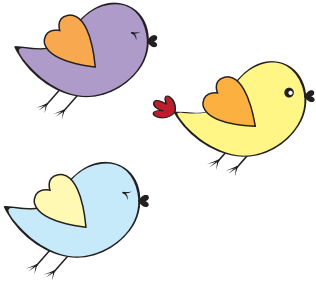

Solve each word problem to find the missing number. Show your work and include an equation.

1) There are 30 colorful birds in a purple tree. If 14 birds are yellow, how many birds are another color?

2) There are 50 yellow and pink jellybeans in a jar. If 22 are yellow, how many jellybeans are pink?

3) There are 42 clowns in a car. If 20 of them are wearing stripes, how many are wearing something else?

4) There are 60 birds flying around and 31 are crows. How many are a different kind of bird?
