

THE PLANETS

Where are they?

All of the planets in the Solar System revolve around the Sun. Some are close to the Sun, while others are farther away. Color in the circle where Pluto is on the diagram to the right. Then, cut out the planet image below and add it to your own diagram of the Solar System.

PLUTO

“The Dwarf Planet” and last from the sun

How many Earth days does it take Pluto to orbit around the sun?

- a) 3
- b) 90,500
- c) 365
