

WORD PROBLEMS FUN

3-Digit Subtraction at the Game

Read the word problem. Write the correct equation.
Show your work as you solve the equation.

Example:

There are 437 girls and 282 boys in the soccer league.
How many more girls than boys are there in the league?

$$\begin{array}{r} 437 \\ - 282 \\ \hline 155 \end{array}$$

1. Coach Lion ordered 528 small jerseys and 191 large jerseys for the league. How many more players wear small jerseys than large ones?
2. There are 671 people watching the soccer game. 482 of them are adults. How many kids are watching the soccer game?
3. Coach Lion had 925 tickets to sell to the next game. If 349 people have bought tickets, how many does the coach have left?
4. Tobi sold 253 bottles of water and 178 juice boxes. How many more bottles of water than juice boxes did Tobi sell?
5. The league has given away 309 pennants. All but 67 were given away to kids. How many kids were given pennants?
