

MATH NINJA

1. Ninja Aki scaled a building that is 70 feet tall, and Ninja Midori scaled a building that is 43 feet tall. What is the combined height of the buildings?
2. Ninja Midori has 63 arrows. Ninja Aki has a difference of 17 arrows. How many arrows does Ninja Aki have?
3. What is the total number of arrows Ninja Midori and Aki have?
4. Momo has 97 disguises. She used 44 disguises for her last mission. How many disguises does she have left?
5. Ninja Rika had 81 darts. Then she increased the total by 15, but had to use 11 for her last mission. How many darts does she have now?
6. Ninja Momo must travel 50 miles to get to the location of her next mission. She has already traveled 28 miles. How many more miles must she go?
7. Ninja Take has 54 kunais to climb the building with. His group leader gives him 79 more. How many kunais does he have all together?
8. Ume collects shurikens, throwing stars. She has 73 shurikens. Take has 23 shurikens to spare. If Take gives these to her, how many shurikens will Ume have?
